GARIMITTA HARI

AWS Cloud / DevOps Engineer

Email: aghari128@gmail.com | Phone: 8074689587 | GitHub: github.com/aghari | LinkedIn: linkedin.com/in/garnimittahari

PROFESSIONAL SUMMARY

Motivated and aspiring AWS and DevOps Engineer with a solid foundation in cloud computing automation, and CI/CD concepts. Skilled in AWS services such as EC2, VPC, IAM, S3, CloudWatch, and CloudFormation. Eager to apply hands-on project experience to build scalable, secure, and efficient cloud environments. Quick learner with strong problem-solving and collaboration skills, ready to contribute to a growing DevOps team.

EDUCATION

- **Bachelor of Technology** - Mother Teresa Institute Of Engineering And Technology (CGPA: 8.15 - 2024)
- **Intermediate (MPC)** – Basavaraja Govt. Jr College, Andhra Pradesh (CGPA: 8.21 - 2020)

SKILLS

- **Cloud** EC2, S3, IAM, VPC, Subnets, Route Tables, ELB, CloudFront, Lambda, API Gateway, DynamoDB, CloudWatch, SNS, RDS (basics), ECS/EKS (learning)
- **Operating Systems:** Windows and Linux (basic administration, user management, permissions)
- **Networking:** Subnets, route tables, security groups, internet gateways
- **Scripting:** Basic Bash, Python fundamentals
- **Infrastructure as Code:** Basic Cloud Formation, Basic Terraform
- **DevOps Basics:** CodePipeline, CodeDeploy, GitHub Actions (beginner)
- **Monitoring, Security and Notification:** CloudWatch, SNS, Basic exposure to Prometheus/Grafana (learning)
- **Soft Skills:** Fast learning, Analytical mindset, Problem-Solving, Teamwork, Adaptability, Communication

COURSES AND CERTIFICATIONS

- **AWS Solution Architecture — Aviz Academy** (Apr 2025-Jun 2025)
- **AWS Cloud Foundation Training — SRTechOps** (Jun 2025)
- **AWS APAC's Solution Architecture job Simulation — Forage** (May 2025-Jun 2025)
- **Courses in DevOps, CI/CD concepts, Cloud networking**

PROJECTS

- **Static Website Hosting using S3 and CloudFront:** Deployed a static website using S3 and optimized global delivery with CloudFront.
- **EC2 Server Hosting with VPC and ELB:** Launched and configured EC2 instances within a custom VPC, implemented Elastic Load Balancer backe
- **Serverless Web Application :** Built a scalable backend using Lambda, API Gateway, and DynamoDB.
- **Real-Time Monitoring and Cost Tracking Solution:** Set up CloudWatch alarms, SNS alerts, and basic AWS cost monitoring for usage optimization.
- **VPC Setup with Subnets and Routing:** Designed a secure VPC with public/private subnets, route tables, and internet gateway.
- **Infrastructure as Code (CloudFormation):** Automated provisioning of VPC, EC2, IAM, and S3 using CloudFormation templates.
